

Employee Performance Appraisal System

End-to-End Workflow Diagram and Stage Mapping

Generated: 2026-04-13 17:48

1) Main Workflow Diagram

2) Workflow Stages and Actors

STAGE	MAIN ACTOR	OUTPUT	POSSIBLE RETURN PATH
Goal Setting	Employee / Manager	Objectives finalized; weight validation at 100%	Manager can request correction
Self Assessment	Employee	Self ratings, achievements, issues, evidence	Manager can send back
Manager Review	Line Manager	Manager ratings and competency scoring	Approver can send back
Approval	Approving Manager	Approval decision + final comments	Send back to manager/employee
Finalization	HR/Admin	Final score + rating label locked	None (record finalized)

3) Scoring Summary

- Business Score: weighted objective ratings from manager review.
- Values Score: averaged competency/values ratings from manager review.
- Overall Score: (Business × business_weight + Values × values_weight) / 100.
- Final Rating: mapped from overall score using configured rating scale levels.

4) Access Control Model

- Role and permission checks are permission-driven via Spatie (DB-managed roles).
- No runtime hardcoded role-name branching for access decisions.
- Policies enforce ownership context (employee, line manager, approving manager).
